
NOTES:

1. All values in gammas
2. Two surveys - one by Cochrane Consultants Ltd. in 1970 and another by Dynasty Explorations Ltd. in 1974 - have been combined on this sheet.
3. All stations which were part of the Cochrane survey have a correction of +270 γ was made to each of the original values. This correction relates all Cochrane stations to the area station used in the Dynasty survey.
4. Where more than one value was available for a station, the mean was calculated, and used as the final value. Values were corrected by 10% before calculation of the mean.
5. All stations for which Dynasty values are available, the Cochrane values are excluded (except for diurnal monitor readings).
6. Contour at 0, ±100, ±200, ±400, ±800, ±1,600, ±3,200 γ and negative counterparts.
