THE DECLINATION OF THE COMPASS NEDDLE 1950

The declination of the compass needle at any place along a red line is the declination given on that red line. At other places the declination is between those given on the neighbouring red lines; thus at the place marked A the declination is between 33°30'E and 34°00'E. The declination of the compass needle is decreasing 4 minutes annually.

Surveys in 1948 and compilation in 1950 by the Topographical Survey from air photographs taken in 1949. Lithographed and printed by the Army Survey Establishment, R.C.E., Department of National Defence, 1952.

REFERENCE

Road, Hard Surface, All Weather	More than 2 Lanes / 2 Lanes / Route No. / Less than 2 Lanes
Road, Loose Surface, All Weather	2 Lanes or More / Less than 2 Lanes / Dry Weather
Road, Special, etc.	Snow Road, Pack Route / Cart Road / Portage or Trail
