
NOTES:

1. All values in gammas
2. Two surveys - one by Cochrane Consultants Ltd. in 1973 and another by Dynasty Explorations Ltd. in 1974 - have been combined on this sheet.

   a) All stations which were part of the Cochrane survey were corrected by +1000 gammas to make for each of the original values this correction relates all Cochrane values to the base station used in 1974 by Dynasty.

   b) Where more than one value was available for a station, the mean was calculated and recorded on the map. Cochrane values were corrected by +1000 before calculation of the mean.

   c) At stations for which Dynasty values only were available, these values were recorded unchanged (except for diurnal variation correction).
3. Contours at 0, +500, +1000, +2000, +4000, +8000, +16,000 γ and negative counterparts
