THE DECLINATION OF THE COMPASS NEEDLE, 1952
The declination of the compass needle at any place along a red line is the declination given on that red line. At other places the declination is found by adding or subtracting the amount shown at the place marked A, the declination is between 31°30'E and 32°30'E. The easterly declinations of the compass needle are decreasing 4.5 minutes annually.
