PLAN SHOWING
CONTROL SURVEY ON

GRUM DEPOSIT
VANGORDA AREA
YUKON TERRITORY

JUNE, JULY, 1975

MAP SHEET 105 K-6

SCALE: 1 : 500 *METRIC*

Control Stations placed in this survey consist of an iron bar 5/8"x30" driven vertically into the ground with the top 6" protruding. The station is monumented with a 4" x 4" x 4' red wooden post erected vertically over the bar with a metal tag stamped the respective station number affixed to the post.

Bearings are astronomic derived from mean bearings calculated from given coordinates of DDH 4, DDH 163, and DDH 159

DISTANCES AND COORDINATES ARE IN METRES

Distances shown are measured balanced distances-not reduced to sea level or corrected for scale factor

Coordinates have been derived from the given coordinates of DDH 4. Coordinates have been balanced by the compass rule

Elevations are derived from Geodetic Bench Mark 72 Y 247 in the Faro Townsite and were obtained by simultaneous trigonometric levelling
