

	Bouvette Formation dolostone		Breccia	Zn %, Pb %, Ag (g/t)	Weighted average grade and interval width
	Quartet (Gillespie Lake?) Group siltstone		Sanded dolostone		≥ 8.00% Zn + Pb
	Drill hole with angle		Crackle breccia		≥ 4.00 < 8.00% Zn + Pb
	Inferred bedding attitude		Mineralized talus		≥ 2.00 < 4.00% Zn + Pb
	Geological contact		Mineralized outcrop		≥ 1.00 < 2.00% Zn + Pb
	Fault (with relative displacement directions)		Overburden		Weakly elevated iron (>1%)
	Soil sample location (sample number, Zn %, Pb %, Ag g/t)		Rock sample location (sample number, Zn %, Pb %, Ag g/t)
