

From (m)	To (m)	Structure Type	MapInfo Code	Attitude TCA	Attitude TRFE	Structure Count	Description	Mineral	Conc.	Mineral Texture
22.65	23.77	SH	81	50	-	-	A foliation is present.			
63.00	63.30	SH	81	35	-	-	A foliation is present.	--	0	---
91.00	91.80	FT	42	-	-	-	micro faulting which offsets bedding. The offset is particularly obvious here as orpiment selectively replaces specific laminations.		0	AN
104.05	109.64	SN	32	-	-	-	A brecciated interval with elongate, angular clasts.	Om	5	PA
110.00	124.36	ST		25	0	50	stylolite's which are parallel to bedding are variably spaced. There are also some randomly oriented stylolite's that cross cut bedding.	--	0	---
124.36	211.80	ST	4	45	-	100	Many stylolite's are parallel to bedding although there are stylolites that occasionally cross cut bedding.	--	0	---
211.80	214.00	ST		-	-	-	Many randomly oriented stylolite's are present.	--	0	---
214.00	214.30	SN	32	-	-	-	A brecciated interval is present.	--	0	---
216.30	224.10	SN	32	-	-	-	A brecciated interval is present.	--	0	---
224.50	226.00	SN	32	-	-	-	A deformed interval. You can see clearly deformed calcite veinlets as well as stylolite's.	--	0	---
233.50	233.60	ST		35	-	-	Stylolite's occur at a consistent orientation.	--	0	---
235.90	236.20	ST		30	-	20	Stylolite's exist at a consistent orientation.	--	0	---
243.43	249.33	SN	32	-	-	-	A brecciated realgar mineralized limestone.
