SCALE

CORE SIZE BQ  
HOLE STARTED June 25, 1981  
HOLE COMPLETED June 30, 1981  
LOGGED BY Tim Stokes

DEPTH IN FEET		DESCRIPTION	DIP
0-240'	GLACIAL ICE		
210	240'-680': ARGILLITE : dark grey to red-brown, slightly hematized argillite. The rock is often strongly fractured and these are filled with a stockwork of calcite ± hematite veins. A few narrow bleached zones occur locally.
