

DRILL HOLE DDH 5

MIDAS CLAIMS

May 18 /87 to May 26 /87# YA 23633-YA 23636
YA 93142-YA 93145

IEWS core size 0.95 in. dia.

Hole bearing 338°Initial dip 60° from Horiz.

Depth From	To	Drilling Conditions	Geological Description	Assays
---------------	----	------------------------	---------------------------	--------

0'	12'	Casing		
12'	20'	Broken ground	Black shale	
20'	45'	Good recovery	Black shale with small quartz stringers and some bedded quartz stringers 1/2" (of sedimentary origin, quartzite)	
45'	60'	Good recovery	Black shale with some sand particles	
at 60'			1/2" quartz vein No mineralization	
60'	64'	Good recovery	Black shale	
At 64'			1" quartz vein No mineralization	
64'	90'	Good recovery	Black shale	
90'	91'	Good recovery	Some small white sandstone layers in black shale	
91'	177'	Good recovery	Black shale with occasional quartz stringers (small 1/4")	
122'	144'	Bad core recovery 10%	Black shale with occasional quartz stringers (small 1/4")	
144'	177'	Fair recovery +80%	Black shale with occasional quartz stringers (small 1/4")	

No assays as no quartz vein of good size was present.
