DEPTH	DESCRIPTION	SAMPLE No.	WIDTH OF SAMPLE				
0 - 12'	altered andesite						
12 - 14'	fresh andesite						
14 - 21'	altered andesite						
21'	fault with mylonite						
22 - 24'	andesite						
24'	fault, mylonite						
24 - 36'	fresh, slightly altered andesite-fault at 34' and 36'						
36'	fragmented andesite; bad cavity - fault?						
36 - 44'	slight - much altered andesite; fragmented						
44	quartz fragments						
44 - 51'	slight - much altered andesite						
52	quartz fragments, pyrite, little galena						
52 - 57'	altered andesite						
57'	fragmented andesite - fault						
58 - 60'	fairly fresh andesite						
60 - 65'	slightly altered andesite and disseminated pyrite						
65'	quartz fragments						
65 - 67'	altered andesite, some pyrite						
67'	quartz for 6", no mineralization						
67 - 70'	altered andesite						
70 - 76'	fragments andesite, quartz and pyrite

DEPTH	DESCRIPTION	SAMPLE No.	WIDTH OF SAMPLE				
76 - 92'	fairly fresh andesite, some disseminated pyrite; fragments quartz at 82 - 86'						
92 - 97'	fairly fresh andesite, some pyrite at 97'						
97 - 102'	quartz stringer, andesite, some pyrite						
102 - 116'	altered andesite and disseminated pyrite, fragments quartz at 100-104, 107-111, 113-116						
116-127	fair, much altered andesite, fragmented at 124 to 127'						
138 - 157'	altered andesite, some quartz						
157'	9" quartz with sulphides*						
158 - 173'	slight - much altered andesite; some quartz and disseminated pyrite						
173 - 208	fairly altered andesite; a little disseminated pyrite						
208 - 266'	fairly altered andesite, becoming fresh altered andesite, quartz and pyrite stringers present, also a little disseminated pyrite						
266 - 271'	fairly fresh andesite						
271'	small fault with mylonite						
271 - 278'	fairly altered andesite; fault at 277'						
278 - 303'	fresh, markedly porphyritic andesite, containing a very small amount of disseminated pyrite						
303 - 333'	fairly fresh andesite, some alteration with quartz and pyrite - small vein with sulphides, mainly pyrite						
333'	small vein with sulphides, mainly pyrite						
333' - 347'	fairly fresh andesite, becoming more altered, a number of small pyrite stringers						
347 - 351'	fragmented, altered andesite with a little sulphide material - fault						
351 - 354'	somewhat altered andesite, a little pyrite (disseminated)						
354'	small pyrite stringer						
354 - 360'	pyrite and galena in a narrow stringer in the core (½")
