Dear Bob:

Re: Flagstone Claims

I am concerned about relinquishing the Flagstone claims.

Although we have drilled two unsuccessful holes on this ground and all of us are inclined to drop them, there are three points not to be overlooked:

1. They are situated along the extension of the main zone of mineralization, and
2. Kim Exploration is about to drill nearby, furthermore
3. Three low intensity gravity anomalies on them have not yet been tested.

The Directors may want to gamble to the extent of holding them for further testing.

With best wishes for the New Year,

Yours sincerely
