Dear Colin:

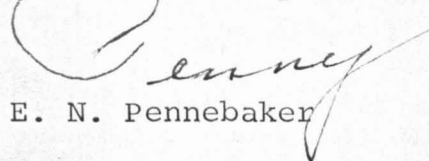

I am now preparing a report on recommended drilling for the Faro area, the recommendations being in essentially the same areas as those we discussed during my recent visit. In order to illustrate the report I shall need four copies each of Drawings WA-38 and WA-44. It will be much appreciated if you will arrange for these to be printed and sent to me by air mail.

These drawings can be folded to 8½x11 size.

Bob Thurmond has asked that I return to Whitehorse shortly after Murray Hampton comes back from his vacation in order to go over the numerous geophysical and geochemical data that soon should be available. I am enclosing a photocopy of my notes listing the information that should be ready in the near future. It will be helpful if I can be advised about October 10 as to which of these items have come in and are ready to review.

With best personal regards,

Yours sincerely

E. N. Pennebaker
