

Table 19: Correlation of estimates and real values in the reestimation of % Pb + Zn grade of B.H.s from B.H.s around (on the same bench).

| B.H. grouping | Interpolation method | Standard deviations | | Correlation coefficient | Regression real = f (estimates) |
|----------------------------------|----------------------|---------------------|-----------|-------------------------|------------------------------------|
| | | Real | Estimates | | |
| All | Kriging | 3.37 | 2.26 | 0.70 | $y = 1.04 x - 0.3$ |
| All | Nearest Neighbor | 3.37 | 3.36 | 0.56 | $y = 0.56 x + 3.2$ |
| 20-30 50-60-70 00-10-40-55 | Kriging | 3.37 | 2.46 | 0.74 | $y = 1.015 x - 0.11$ |
