RE: Grum Camp - Recent Developments

DATE: 08 27 1991

Attached is an inventory of the unracked core boxes at Grum. Labelling on the 1990 Vangorda boxes is beginning to fade. Core boxes from the Dy (1990-91) and Grum (1991) drilling programs have been protected by nailing core box lids over the written box ends.

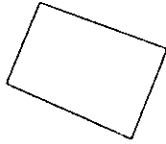

The core logging area is starting to look rather like a dump site. All reject samples from the kitchen trailer are now stored outside in 5 gallon pails. Some of the pails are uncovered and contain water. Some of the reject samples have been dumped out of the pails (behind the core logging shack).

An electrical power pole has now been installed behind the tents located where bunkhouse #3 used to reside.

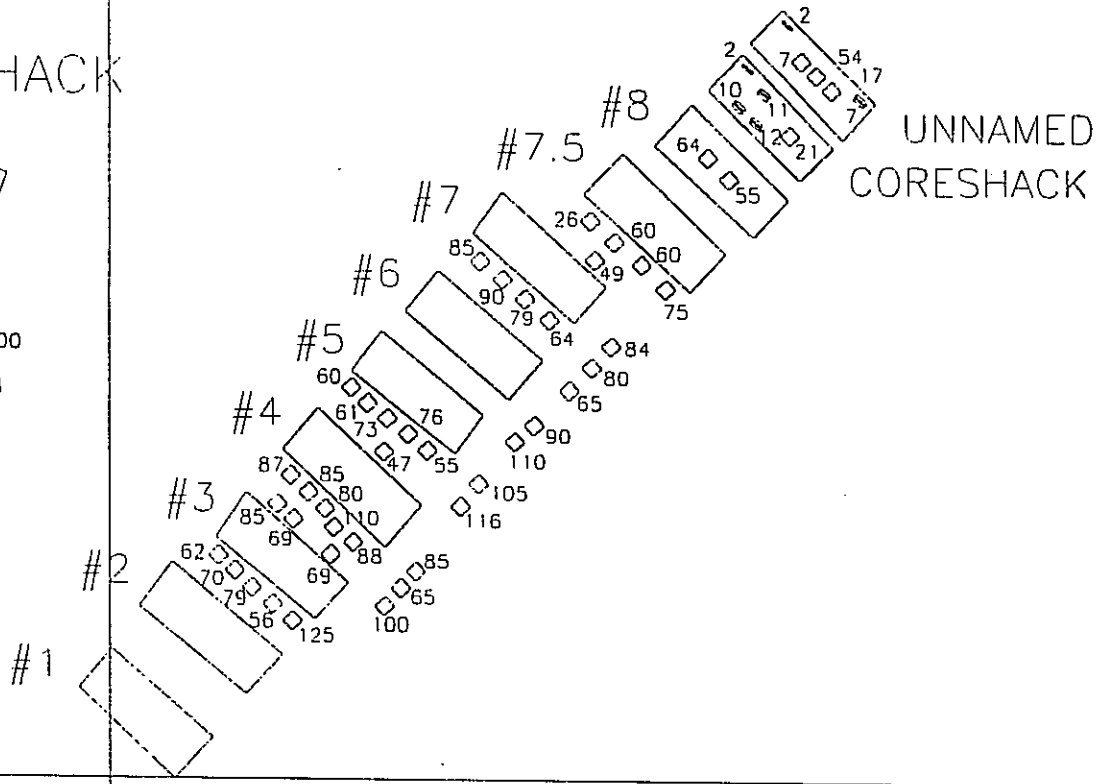

The office trailer has been emptied of all labelled samples.
