Attention: Mr. Leo Hwozdyk
Mine Project Superintendent

Dear Sir:

Re: Professional Engineer's Report on
Ground Stability of the Mining Methods

With regards to our recent conversation concerning your proposed underground mine, I would like to inform you that under Section 36(1)(j) of the Occupational Health and Safety Act, I would like to receive a professional engineer's recommendations concerning ground stability of the proposed mining method.

The recommendations should include suggested topics, i.e., geology of the mine, geometry of proposed excavation, mining methods, blasting methods, ground support system, ventilation and heating, etc. The professional engineer writing the report must have similar experience in mining projects elsewhere.

Yours truly,

R. N. Prasad

R.N. Prasad, P.Eng.
Chief Mines Safety Officer
