MEMORANDUM

TO: M. O. Hampton
 FROM: P. M. Pettigrew
 DATE: October 19, 1971
 SUBJECT: PB/ZN BREAKDOWN FOR 1972 MILL FEED

Tonnages and grades of ore remaining at end of 1971 and developed in Phases 1 and 2 in 1972.

(Lead and Zinc values are based on a weighted average of planimetered tonnages and DDH Lead and Zinc assays on a per-tonnage-block basis).

Developed in 1971 for 1972:

736,970 tons	4.47% Pb	7.05% Zn
--------------	----------	----------

Developed in 1972:

Phase 1:	1,191,220 tons	4.43% Pb	7.13% Zn
----------	----------------	----------	----------

Phase 2:	976,317 tons	4.09% Pb	7.42% Zn
----------	--------------	----------	----------

P. M. Pettigrew
Ore Control Geologist
