SUBJECT Quarterly Predictions

FOLD Starting with the first quarter review, production statistic predictions will be required by Accounting for a full 12 month period. This means that, in addition to updates for the last 3 quarters of this year, a prediction for the first quarter 1977 is also required. This will be an ongoing requirement in later reviews, also. Grade prediction by month, rather than by quarters, is also required. These requirements are necessitated by the extremely inflexible shipping schedules for the coming year.
