MEMORANDUM

October 21, 1996

To: Kurt Forgaard

From: Ralph Sultan

Re: ~~M&M Property~~
mm # 35

Pamcon
Alaska Minerals

CEO
↓

About a year ago, I received several telephone calls from a Steve Todrick in Vancouver (684-5901) who was interested in taking an option on the M&M Property on some sort of basis. He claimed that he was involved in exploration work in the Ross River area.

At that time, I told him Anvil's own plans were not sufficiently far advanced for any discussions, but that we would probably be doing work ourselves. (I think I told you about this contact at the time.)

In any event, this morning I received another telephone call from Steve Todrick who told me a friend of his in Yukon had flown over and told him a drilling rig was on the M&M site, and did we have any additional interest in discussing our plans with him?

I said that would be something for him to discuss with the CEO, so you might be getting a telephone call from him. I know absolutely nothing about Steve Todrick or his company.

Done

Dick.

I called Steve Todrick and left a message but he has not called back. Will you follow up. Does Gregg know what this person is up to in the Yukon.
