June 5th

Attention: **Richard Arndt**

Dear Mr. Arndt

This letter is sent in response to our recent telephone conversation regarding access to the MM property as part of a Yukon wide study that will involve an examination of VHMS deposits located within the Yukon-Tanana Terrane and the Selwyn Basin in order to identify favourable host stratigraphy and deposit characteristics.

As part of this study I would like to visit the MM property and carry out some mapping, sample collection and core logging (I believe the core is stored at the Faro Mine and that Greg Jilson (and/or Lee Pigage) know of its whereabouts). I would appreciate it if you could let me know if this will be possible. Also if you have any questions regarding the MM property that I may be able to help in answering during the course of this study please let me know.

If you have any questions or concerns about this study please call me at (403) 667 3829 or Fax. (403) 667 3198, E-mail: huntj.inac.gc.ca

Sincerely,

Julie Hunt  
Mineral Deposits Geologist
