

L - 48 E.

- ① Residual gravity profile from Graphical smoothing
- ② " " " " from 9' point grid/circle - spacing 800'
- ③ " " " " from 9' point grid/circle - spacing 1600'
- ④ Calculated gravity profile for the three horizontal cylinders as shown above at final strike lengths. Radii obtained from profiles ② and ③. Strike lengths suggested by residual map. Density contrast = 1.0

**CYPRUS ANVIL MINING CORP**
