

Feb. 004071

English system elevations  
 1ms. 3200, 3600, 3500  
 4000 etc on X-Sections  
 are accurate only for  
 old P.A. ELEVATIONS.

Drill Hole COLLARS  
 ON METRIC SECTIONS  
 (1:500) ARE CORRECT  
 WHEN SCALED FROM  
 METRIC DATUMS 1000,  
 1100, 1200 ETC.

I suggest you convert  
 these English elevations  
 to metric by multiplying  
 by 0.3048 = meters.

There is not much point  
 in trying to use any  
 English System measurements  
 of the geologic X-Sections  
 but if you must, remember  
 that they are no longer  
 1" = 40' the drill hole  
 colors will be 42.0' too  
 low because the datum  
 on the Green property was  
 increased by that amount  
 this year.

Bill

04: 6: W. L. 15 = AUG
