Mineral Assessment Geologist
Yukon Territorial Government
Box 2703 Whitehorse Y.T. Y1A 2C6

RE: CITY OF WHITEHORSE - GEOPHYSICAL DATA EVALUATION

Dear Danielle,

As per our contract of June 30, 1997, this letter summarizes our compilation of the available private and public domain geophysical data conducted to assist your evaluation of mineral resource potential in the City of Whitehorse.

a. Work performed. M. Power, J. Mitchell and D. Goodwin were employed in the collection, reproduction and assembly of available geophysical data. All open assessment reports on NTS sheets 105 D 10,11, 14 and 15 were examined and two copies were made of pertinent sections of those reports containing geophysical survey data. One set was forwarded to Jeff Mitchell, P.Geoph. who also examined private geophysical data made available by Hudson Bay Mining & Smelting Co. Ltd.

b. Results. The attached table briefly summarizes the data assembled by our staff. An extremely large data set was made available by HBMS and we were only able to make a cursory examination of this data set. In addition to the HBMS data set, the following total production is available for examination:

Magnetics	350 line-km
Induced Polarization	340 line-km
Electromagnetics	138 line-km
Radiometrics	34 line-km
Gravity	2 line-km

I understand that you have already inspected the data collected in Whitehorse with D. Goodwin earlier this month. This work entailed 65.6 hours of work, a portion of may have to be recovered from any subsequent contract to complete an evaluation of this data. An invoice for a portion of the work conducted to date is attached.

A proposal to complete an evaluation of this data set is attached to this letter as per our contract. Thank you for the opportunity to work with you on this project.

Yours sincerely,
AMEROK GEOSCIENCES LTD.

A handwritten signature in black ink, appearing to read 'M.A. Power'. The signature is stylized with a large, looped 'M' and 'P'.
