

occurrence
compute data for
specific area.

ups - down
instr.

little loc. deposit.

not insignificant
non-conductive
deposits.

no parameters for
airborne.
many areas, unworked
- not much overlap between
airborne + IPTS

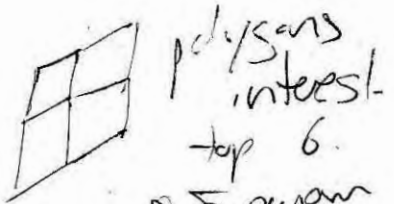

little input from
mag.

symbols from map.

mag map - tooish
musashi
useless

their interpretation

AP are important.
constant
over each deposit
sharing
need 1 data set.

polygons
interest
top 6.
28 areas
based on airborne EM
2 sets - flight lines
ranked ~~_____~~

difficult to eliminate
anything on basis
of EM.

not much correspon-
between air borne
+ mineral deposits.

airborne.
interpretation of
data, no data.

set mag - air borne.
