CURRAGH RESOURCES INC

INTER-OFFICE MEMORANDUM

FARO OFFICE

DATE: June 20, 1990

TO: DINO BASSO
MANAGER OF MINING

FROM: WM. W. DUNN
CHIEF ENGINEER

SUBJECT: CONVERSION OF SURVEY/GEOLOGY DATA TO COMMON GRIDS
ON THE VANGORDA PLATEAU

=====

At present there are four separate control grids in the Grum/Vangorda area. Geological reserves and some pit designs are done on the local Geological Grids. I. Vantilla's pit designs and the Ortho photo contours are on the UTM grid and all Survey work is on the local Mine grid .

We do not have a conversion package to transfer data files from one co-ordinate system to another and this results in considerable confusion.

I am acquiring a conversion package from Gemcom to remedy this problem and all future work will be done with reference to the local Geology grids.

Wm. W. Dunn
Chief Engineer
