NB limits of Glac'n

∴ Earl → possibly looking at higher elev than (6500'±) than Sk. Dep for similar type mineralized vns. ← if movement post min.

- also look at lower elev since movement may be pre min → look at 5500' level also ^{suppose to be} good depth extent to Sk. Dep.

∴ Good Targets on Earl
NE + SE corners.

- also ^{poss} extension of ~~the~~ Charleston vn w-NW trend thru SE part of Earl.

The Said

- possibly min at lower elev than Mt. Sk (5500') i.e. - off property!!
or lower

- look for vn trends on skew.
