

BEAR CLAIMS

Sept. '84

YBE-DR1	Grab, float	Tuff breccia. Pink, green, and purple angular fragments in purple matrix. Weakly brecciated with slickensides.
YBE-DR2	Grab, float	Rhyolite, white, intensely corroded, with strong sericitic alteration.
YBE-DR3	Grab, float	Similar to DR1 but with some degree of flowage texture and corroded matrix.
YBE-DR4		Red-orange soil.
YBE-DR5	Grab, float	Rhyolite, gray-white, strongly corroded and weakly quartz-veined.
YBE-JR1	Rough chip? /5m	Rhyolite to rhyolite lapilli tuff, clay-altered, rusty, yellow-orange weathering, fine disseminated pyrite
YBE-JR2	Grab, float	Rhyolite porphyry, orange-yellow stained, with fine disseminated pyrite.
YBE-JR3	Grab, float	Rhyolite porphyry, moderately sericitic and clay-altered, bright orange stain, and short quartz stringers.
YBE-JR4	Grab, float	Rhyolite porphyry or lapilli tuff, weakly sericitic, moderately clay altered, with siliceous veining to 1cm.
YBE-HR1	Composite, outcrop, /20m	Lapilli tuff, maroon-grey, with intense clay alteration. Intense yellow stain and rust.
YBE-HR2	Grab, float	Volcanic breccia. Clay altered, silicified rhyolite? clasts in grungy purple matrix.
YBE-HR3	Grab, float	Quartz, white-grey, in rhyolite, intensely rusty.
