Attention: Mr. Marv Pelley

Dear Sirs:

Re: Geotechnical and Hydrogeological Investigations
of Grum and Vangorda Deposits

With reference to our discussion of June 22, 1987, Piteau Associates Engineering Ltd. would be pleased to provide geotechnical and hydrogeological consulting services to Curragh Resources Inc. for the Grum and Vangorda Deposits. As requested, the personnel who would be available to provide input into the study, and their charge-out rates, are as follows:

→ Alan Stewart	Geotechnical Engineer	\$65/hr
→ Frederic Claridge	Geotechnical Engineer	\$70/hr
Mark Hawley	Geotechnical Engineer	\$55/hr
Allan Dakin	Hydrogeologist	\$70/hr
Andrew Holmes	Hydrogeologist	\$55/hr

While I know that, through our involvement with various projects at Quintette, you are aware of the technical backgrounds of Fred Claridge, Mark Hawley and myself, you may not be as familiar with Allan Dakin and Andrew Holmes. Mr. Dakin, who I believe you met briefly at Quintette, is our senior hydrogeologist; Mr. Holmes has been carrying out our recent hydrogeological work for the Anvil Pit. Resumes for all of the above-listed engineers are included for your review. Should the need for junior engineer level personnel arise, this would be charged out at a rate of \$30/hr.

I trust the above is sufficient for your needs at this time. Please do not hesitate to contact me should you have any further questions, or require additional information.

Yours very truly,

PITEAU ASSOCIATES ENGINEERING LTD.
