Mineral Exploration Services

C O R P O R A T E P H I L O S O P H Y

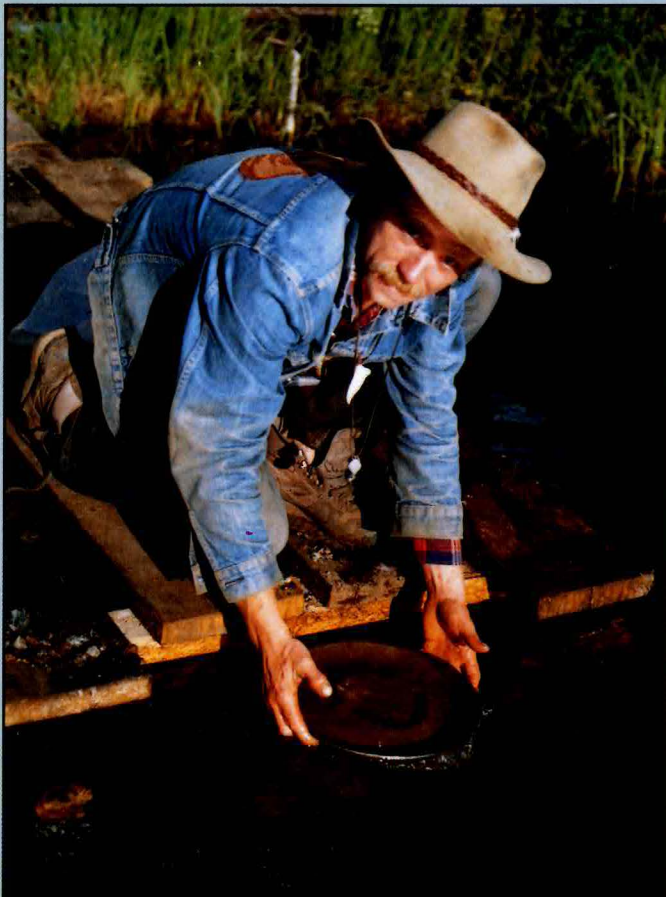

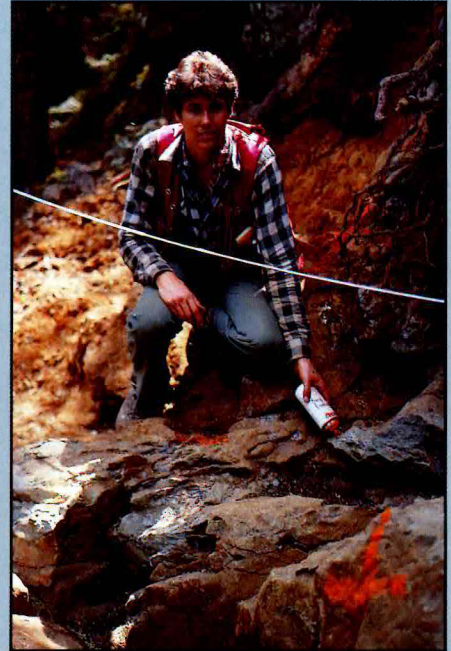

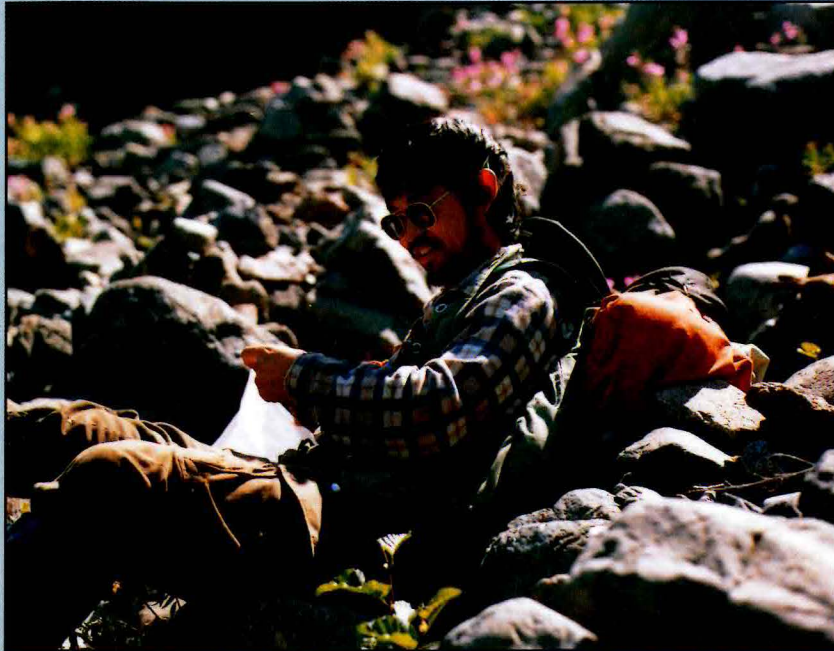

At Equity Engineering, we believe that service to our clients must remain our first priority. This dedication to service takes many forms:

- thoroughly researching your property's past exploration history and its regional context
- preparing detailed program budgets for client approval prior to commencement of work
- employing only the most experienced, competent and motivated field personnel, several of whom are also Certified Blasters, Industrial First Aid Attendants or fluent in Spanish
- maintaining a high level of communication with our clients throughout the course of exploration
- utilizing computer-based field accounting, to ensure that your exploration program comes in within budget
- providing detailed invoices to our clients and maintaining full accountability with complete backup documentation as required
- preparing well-researched technical reports
- storing without charge all of our clients' assay pulps for further analysis in the future
- maintaining strict confidentiality in every aspect of the client/consultant relationship

Mineral Exploration Services

S E R V I C E S

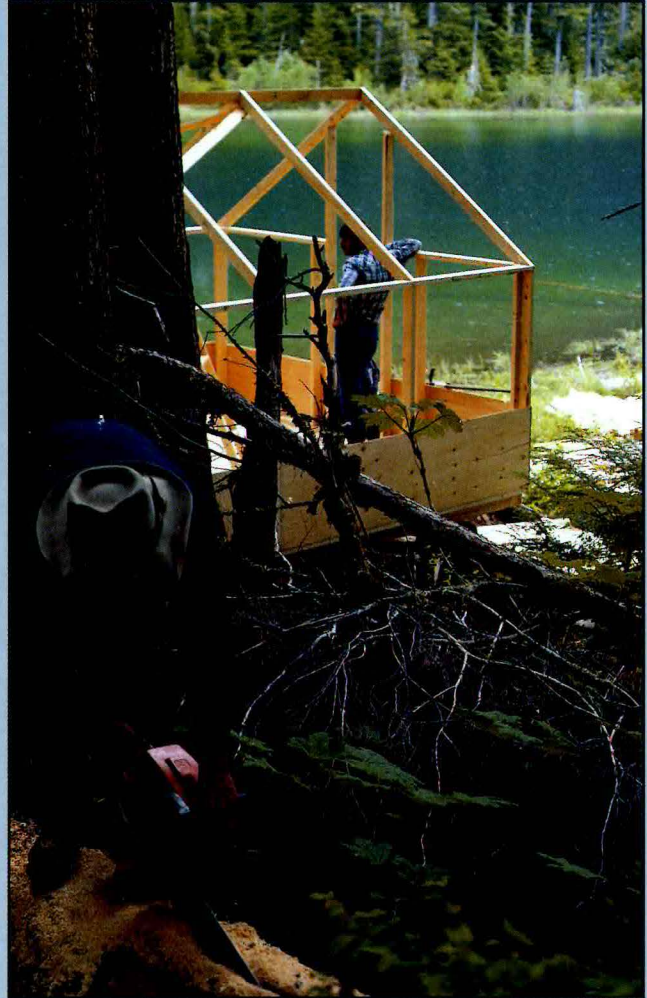

Equity Engineering Ltd. offers a complete range of mineral exploration services to the mining industry including:

- **Project Management:** Equity Engineering will manage and execute your complete exploration program, including all aspects of field work, technical direction, budget control, supervision of sub-contractors, logistics, accounting and report preparation.
- **Property Examination and Evaluation:** Equity Engineering will examine your mining property, compile and analyze the results of all previous exploration conducted upon it, prepare recommendations upon which to base future exploration, and produce a well-researched technical report which exceeds the requirements for public financing.
- **Property Acquisition:** Claim staking as well as researching and developing new target areas for mineral exploration.

Helicopter Supported Exploration — McLymont Creek, British Columbia

Camp Construction — Iskut River area, British Columbia
