To W. M. Sirola From P. M. Kavanagh **KERR ADDISON GOLD MINES LTD.**
Subject Mount Nansen Mines Data. Date September 8th, 1965.

115-H

On July 27th, 1965, Walter Clarke, Exploration Manager of the Discovery Mines-Rayrock-Radiore Organization, gave me the following summary information he had arrived at after spending several days on the Mount Nansen properties ^{accompanied} ~~gold~~, by a young geologist from the Ormsby property, owned by Discovery.

Re: The Weber Vein. Clarke estimated that in two shoots they had 9,000 tons well indicated, grading .31 oz. gold, 23.75 oz. silver, and in addition they had a sub-ore tonnage of 24,000 tons grading .17 oz. gold, and 4.7 oz. silver.

Re: The Huestis Vein. He considered that they had well established 15,000 tons, grading .67 oz. gold, and 19.66 oz. silver, and in addition a sub-ore tonnage of 700 tons grading .28 oz. gold, and 4.38 oz. silver. Subsequently sometime in August he mentioned to me that his further analyses of the data indicated that the silver assays in all of the adit sampling were on the average 45% lower than the silver assays from the surface sampling. He suggested this was alarmingly disconcerting considering that the adits were only about 150 feet vertically below the surface sampling areas.

I think it best that you keep this information rather confidential. I gave it to Don Cannon over the phone from your office last week because, as you know, Newmont was a participant in our original Mount Nansen Syndicate, and because Don had recently taken Bern Brynelson's place on the Mount Nansen Board as our Syndicate representative.

Per

Mr. A. Stone,
420 - 475 Howe Street,
Vancouver 1, B.C.

Dear Mr. Stone:

Thank you for your letter of May 11th extending an opportunity to us to renew our active participation in the Mount Nansen property.

We regret that our very heavy exploration and development commitments for this year make it impossible for us to consider participating in the financing Mount Nansen presently requires.

Yours sincerely,

Paul M. Kavanagh
Chief Geologist - Exploration.
