AMOCO Visit to Property May 27/80

Phone message from Alvin Jackson.

1. Core not on property. All Core now stored @ GRC. D.D. Core warehouse in Whitehorse.
2. Alvin Jackson has examined the drill core.
3. Alvin says he did not see enough in the core to report a favorable recommendation, particularly in an isolated location, lack of rock outcrop to guide future work, and much ^{more} drilling to obtain geology + structure.
4. Alteration is not as strong as the drill logs indicated.
5. Although some drill holes show interesting rocks + mineralization + stockwork.
6. Especially D.D. Hole #1, where stockwork is best displayed, and mineralization is evident and should be split for assays.
7. Alvin recommends more work should be done by Kerr.

John Kerr
May 27/80.
