

CURRAGH RESOURCES INC.  
INTER-OFFICE MEMORANDUM  
FARO OFFICE

007113

DATE: March 7, 1990

TO: Dino Basso  
Manager of Mining

FROM: William W. Dunn  
Chief Engineer

SUBJECT: TRUCK LOAD FACTORS - FEBRUARY 1990

=====

The truck load factor for the month of February was calculated using the final production figures for February.

The reconciled load factors are:

| Month   | S-Phase FARO |       | E-Phase FARO<br>Waste | GRUM<br>Waste |
|---------|--------------|-------|-----------------------|---------------|
|         | Ore          | Waste |                       |               |
| Feb./90 | 142          | 147   | 141                   | 142           |
| Jan./90 | 149          | 138   | 134                   | 109           |
| Dec./89 | 126          | 144   | 127                   | 173           |

The calculations assume a payload on the 120 ton trucks of 81 tonnes/load.

William W. Dunn  
Chief Engineer
