13580	8%	S - Tonnes lost due to Subcropping of ore on the bench toes.
35629	20%	M - Thin bands along the Main Zone fault.
26947	15%	R - Massive pyritic high grade in contact with semi massive pyritic footwall.
54381	31%	F - Tonnes lost due to freedigging of ore with no geologic control. (no blastholes)
46067	26%	+ - Thin bands not recovered due size and structure.
