To.....A. Kulan.....From.....P. M. Kavanagh.....

Subject.....Bornite Occurrence, Yukon.....Date.....October 1, 1962.....

In checking over all the notes, etc. which I collected during my recent extended trip in western Canada, I have run across a brief note I had to prompt me to ask you about a reported 10 foot wide bornite occurrence in the Ross River area which I think Bill Sirola had mentioned to me in August that you were going to check.

I can't remember what if anything you told me about this situation when I was with you, so I wish you would write to me telling me what you know about it and what if anything you have done about checking it.

Paul M. Kavanagh
Chief Geologist - Exploration
