

Scottie Creek

Regional Geological Mapping - D.T-K 72-

Regional Stream Sediment Sampling

007455

SLIDES. Regional Mineral Potential Maps.

Exposures limited - Generally recessive units
- vegetation

INTRUSIVE ROCKS.

- Whitehorse suite
- Jurassic
- Alaskite - Not seen. - investigated
white boulders granodiorite.

meta-sedimentary rocks.

- Klondike schist - shallow dip north
- underlying sandstone / quartzite

NORTH OF AREA Moosehorn Range.

Placer Creeks - Judas River?

Longline

MINFILE - Starvation Mountain

- unknown - Qz on in hand pit.
- sheet stockwork of veinlets.

Magnetic trends

Silt samples - organic creek bottoms

Soil samples - soil generally poor but
some well drained areas

ORE Deposit Models - Regional Mineral Potential
