A Mr. Leo Finnigan visited my office this morning and told me that his sons and a man by the name of Al Triggs have staked 24 claims on May Hill in the country west of Mount Haldane in the Mayo District. The claims cover a silver-bearing zone which Mr. Finnigan advertises as being potentially better than the United Keno Hill mine. He did not have any further definite information about the occurrence other than the assay results listed below of two grab samples.

Mr. Finnigan and his sons have a small placer gold operation on Thunder Creek in the Mayo District, and Triggs is their foreman.

Two grab samples taken during the staking have assayed as follows:

- No. 1: tr. Au, 29.1 Oz. Ag, 3.89% Cu, 0.64% Zn, 62.81% Pb
- No. 2: 0.1 Au, 61.0 oz. Ag, - 0.34% Zn, 26.54% Pb

The claims are apparently only easily accessible by helicopter.

You may perhaps already have information about the occurrence and/or the area in question. If you do not have, then you have my okay to arrange to make an examination using a helicopter. The man to contact is Victor Finnigan, one of the sons, at P. O. Box 73, Mayo.

Mr. Leo Finnigan said he would write to his son asking him to get in touch with you; I gave him your address and telephone number. If you decide to make the examination, I think that you should contact the son, rather than wait for him to contact you.

Paul M. Kavanagh
Chief Geologist - Exploration
