You may be interested to know that Gordon Dickson staked the ground known as the Dickson Yukon Syndicate in November of 1963. This ground included Prospectors Airway's original "Gal" group and a portion of what is now the Faro orebody.

I am under the distinct impression that the staking of this group was instigated by Al Kulan immediately after the completion of our aeromagnetic survey at Swim Lakes. You will recall that the recording date of the original Swim Lakes "A" group was October 18th, 1963.

I know that Al had a long session with Gordon Dickson immediately upon our return to Whitehorse after we completed the flying at Swim Lakes. Since he was in our employ at that time, he obviously could not stake the ground himself.

A portion of the Dickson Yukon Syndicate ground (particularly the northwest end covering the Faro Deposit) ultimately lapsed and was then acquired by Dynasty. I will ask Fred to check the exact date of that staking when he is in Whitehorse but I assume for the moment that Dynasty picked up the ground as soon as it became open.
