

① The 1965 study work costs could be assembled as follows.

Study survey	2058.	28
Camp costs	336	12
Flying costs	350	56
	336	28
	<hr/>	76
	2942	
Supervisory	420	3200
Supervisor	200	2742
	<hr/>	458
	<u>3362</u>	

008603

This work could be used to cover 2 groups of 16

Since assessment reports are now Confidential and until as long as the claim group is in food study & since no assays are required, and since we shall be packing up the data for assessment purposes, we could file 5 years

work on a '6 claim from this
year. Next year again
using the duty on Swin
25 in c. we could file 5
years work on an additional
16 claims. Similarly 5 years work
on 32 claims. By duty;
additional ^{adequately} ~~under~~ next year
we could cover those 16
claims on which work
would be due in Oct 1966.

Swin 49-72 area.
Separate problem since the
annoyance date is July 1966. The
grouping of these claims can be
determined before then.

Since a lease may be
applied for after 5 years of
work has been done, some

of the claim ~~and~~ will facilitate
this category.

I see no alternative to this year
using the party ^{to this year} ~~being~~ for
32 claim & dully for the
remaining 16. However, since
the dully would have to
be declared this year we
should take full benefit
of for the work we have done.

I will leave the disposition
of the group to the capable
hands of Ted Jacka but he
particularly should bear in mind
that we can carry another
5 years work on 16 claims
next year regardless of what
we move of Swin to or not.
