

MacDonald, B - Epith. Au Minzlc & Altⁿ in Eoc. Rocks
at Mt. Skukum

- Some values not only in qtz, but also in altered wallrock and in breccia zones.
- Brandy Zone now stands at 27,500 ft. 17.1g Au, 13.9 Ag open on strike and to depth.
- Alteration is magnetite destructive
- Cirque and Brandy Zones are in (or on edges of) a V shaped graben [similar to our postulation for Mt. Nansen veins]
- Brandy Zone also has adjacent felsic dykes.
