MESSAGE
(TO BE COMPLETED IN TRIPLICATE)

Dear Alex:

Alan Kulan phone me from Whitehorse Xmas night and reported there has been some staking of claims on an asbestos occurrence 12 miles west of Northern Lake on the Quiet Lake sheet in the Yukon. The coord. would be about 61-45: 134-00. A man named Smith, who is not known to Kulan brought some samples of ½ inch good-looking fibre in to Whitehorse and went back to the area on Dec 19/20th.

Kulan says the find is reported to have been made by Roddick's GSC party when mapping the area around Quiet Lake. From Roddick's preliminary field maps last summer, I sketched a mass of ultrabasic rocks on the west borders of the Quiet Lake Sheet immediately North of Big Salmon River. Topo sheet 105F refers. The ultrabasics extend north for 6 miles from the B.S. and extend west on the Laberge Sheet, mapped geol. some years ago.

Kulan and Dickson were planning on flying over the area over this past weekend, to attempt to find the location of an staking. Al said that Egil Livgaard, a graduate geologist, prospected that area in 1957 for BY Explorations. I talked to Livgaard here, yesterday; he says he did not see any fibre in his search; however, Kulan's idea is that if he can eliminate the part of the ultrabasic prospected by Livgaard, he may be able to pin-point the area of the occurrence. I have arranged to get that detailed information from Livgaard for Kulan.

There were persistent rumors last October that backs up this story. I suggest you phone Jim Roddick at Ottawa and get any information he is free to release. Jim will tell you everything he can and he might be able to give you his own assessment of the showing.

Cecil McLennan, who is a part time prospector and a good friend of P.A's, at Whitehorse has gone into the area over Xmas to stake claims.

I am going Pavilion on that Copper showing tues. returning Wed night; I'll keep you advised

Rod Macrae

could not contact Roddick by phone to-day. Will try again to-morrow. H.A.P. 30/12/59

INSTRUCTIONS FOR USE OF THIS FORM

Form to be completed in triplicate by originator. Two copies — No. 1 and No. 2 — to be forwarded to addressee. Copy No. 3 to be retained in originator's file until reply received. Addressee to complete reply in duplicate on reverse side of sheets 1 and 2 and return No. 1 to originator. In following this procedure both parties have the complete message and reply on one sheet of paper.
