I arranged by phone with Joe Adie of Census on Sept. 29th to postpone all of the usual first-week-of-the-month Vancouver meetings to the 3rd Tues. & Wed. of October. Dave Sharpstone told me that

When he & Adie arrived on the property they found that who had borrowed two men to go on some junket 150 miles away and none but Dave Seymour was working on geochern. TITAN PROJECT

They laid out 6 geochern grids for Seymour consisting of 60-70 samples each. There are 4 areas on the south limb and two on the north limb.

The geochern on Area "A" is complete and the samples have been sent to the Noranda lab in accordance with Alvis' suggestion for more thorough analysis.

The test pitting has not been started because the ground is too wet. It will probably freeze very soon.

About all that will be decided at the next meeting will be the amount of money needed to keep the programme going through October. Everyone seems to be in accord with completing the geochron & doing the test pitting. Sharpstone would like to defer the meeting until Oct. 15th but feels that the funds will have run out before then. The date of Oct 15th would be more convenient because all of the geochron permits would be available and we would know what additional work, if any should be done.

Apparently Alice & Phil have agreed that 360 claims should be kept in good standing and this will cost 1800.00. The funds will probably have run out about Sept 30th and whether or not the meeting is held then, some additional money will be required to finish the programme.

The crew now consists of Seymour, Hampton, French, two miners and the cook.

I think we should advance our share of the additional money but the meeting could be ^{much} more advantageously held on the 15th if the results are in.

Regards.
Bill
