UNIT	DESCRIPTION
10	grey weathering, black baritic limestone
9	black chert, with brown vein and fracture filling barite
8	rusty weathering, black shale and argillite
7	black chert with barite (equiv. to 9)
6	" shale and argillite (" " 8)
5	" chert with barite (" " 9)
4	" shale and argillite (" " 8)
3	light grey granite to pebble chert conglomerate and chert wacke
2	black chert
1	conglomerate and wacke (equiv. to 3)

- Geological contact (approximate, assumed)
- fault (approximate)
- outcrop
- talus
