

- EXPLANATION**
- Lithology**
- Qal Thick fluvial and terrace deposits of Rose Creek Valley
  - H Diorite - quartz diorite, felsic porphyry dykes
  - G Amygdaloidal chloritic phyllite
  - F Undifferentiated grey sericite - graphitic - chlorite phyllite, limy phyllite and greenstone
  - E Undifferentiated grey phyllite, calc silicate phyllite and greenstone
  - D Gabbro-pyroxenite complex
  - C Greenstone - sills, flows of tuffs
  - B Calc silicate phyllite
  - A Calc silicate schist
- Symbols**
- Inferred fault
  - Inferred contact
  - S<sub>1</sub> Foliation
  - S<sub>2</sub> Foliation
  - Crenulation lineation - later than D<sub>2</sub>
  - D<sub>2</sub> Fold showing down plunge symmetry
  - Outcrop
  - Occurrence of local angular float
  - Claim post

CYPRUS ANVIL MINING CORPORATION  
HEK GRID  
Faro Area Yukon
