

LEGEND

ROCK TYPES (in Anvil Range)	GEOLOGICAL	SYMBOLS	GEOCHEMICAL / GEOPHYSICAL
<input type="checkbox"/> Biotite quartz monzonite granodiorite	⊙ 66-S3 Diamond drill hole location and number		Zn soil anomaly and threshold value in ppm.
<input type="checkbox"/> Basalts - (Anvil Range Group)	⊙ 72-15 Rotary drill hole location and number		Cu soil anomaly and threshold value in ppm.
<input type="checkbox"/> Fossiliferous Limestone			Pb soil anomaly and threshold value in ppm.
<input type="checkbox"/> Biotite muscovite phyllite	— Defined geological contact		Federal AMAG anomaly
<input type="checkbox"/> Graphitic phyllite	- - - Inferred geological contact		Lockwood AEM anomaly
<input type="checkbox"/> Banded chlorite phyllite			Residual gravity anomaly values in milligals
<input type="checkbox"/> Metabasite			Turam anomaly
