NOTES:
1. All values in gammas
2. This survey was by Cochrane Consultants Ltd. in 1974 - data by Dynasty Explorations Ltd. in 1974 - have been combined in this sheet
3. All stations which were part of the Cochrane survey had a correction of +270 γ per mule applied to the data values. This correction factor was determined by comparing values at the base station used in 1974 by Dynasty.
4. Where more than one value was available for a station, the mean value was used and rounded off to the nearest 5 γ. Values were corrected by 1270 γ before contouring of the data.
5. All stations for which Dynasty values were available have been used, including readings from 1st, 2nd, 3rd, 4th, 5th, 6th, 7th, 8th, 9th, 10th, 11th, 12th, 13th, 14th, 15th, 16th, 17th, 18th, 19th, Geology Summary

Locally interesting alterations of SYEN and PPQZ. Alteration zones apparently not continuous over a large area. Quartz veins and silicification discouragingly scarce. PPQZ abundance interesting.
