Mr. Ivor Mast,
Atlas Explorations Ltd.,
Box 3050,
Whitehorse, Y. T.

Dear Ivor:

Thank you for your letter of March 12 with enclosed specimens of antimony and copper mineralization from Antimony Mountain near the headwaters of Fish Creek.

I have been familiar with the location of this property for a number of years, as have most of us, but have never examined it myself. Regardless of its possible merits, we are not in a position at this time to make the type of examination that might be instrumental in changing the picture that must have been arrived at by others who did not decide to do any substantial work.

Accordingly, please inform Mr. Collins that we are presently too fully engaged in other activities to examine the property.

Thank you for bringing this to our attention.

Yours very truly,
ATLAS EXPLORATIONS LTD.

Aaro E. Aho
President

ATLAS EXPLORATIONS LIMITED

(N.P.L.)

BOX 3050

WHITEHORSE, YUKON TERRITORY

March 12/68

Atlas Explorations Ltd.,
330 - 355 Burrard St.,
Vancouver, B.C.

Attention. Dr Aho.

Re - Prospect - Phil Collins
Dawson, Y.T.

The above noted in to see me today regarding a Stibnite property, near the headwaters of Fish Creek, just east of the Dempster Highway. 138 - 12 W 64 - 18 N.

The following claims held by him and partners -

Phil Collins Marth 1 & 2 Sandow 10, 12, 13 & 14.
Knut Hillgren Sandow 1, 2, 3, & 4.
Frank Burkhart)
Chester Henderson) Walker 1,2,3, & 4.

This property and other claims in the area were examined by Conwest, Dr Smitheringale and Carl Bryden, some years ago.

Collins claims that from Conwest assays, the values were excellent, with gold running over an ounce. They have done very little work on these claims, but vein is said to be 4 feet wide and can be intermittantly traced for 1500 feet.

He left two samples, one a piece of a larger chunk which he had. Claims there is litterly tons of the stuff, as float in the draws. The copper sample, is a piece of float found on his claims last year when he did some assessment work.

Access is by chopper only and the profile steep.

These men are open to an examination agreement, not looking for any large down payment, but do want to participate in shares in a company and retaining a small interest.

If samples supplied are interesting enough, you might like to contact him direct, realizing that no snow free access is possible till mid July.

Ivor A. Mast
