

- LEGEND**
- - - limit of outcrop
 - - - geological contacts assumed, defined
 - x - mineral showing
 - - soil sample location
 - ▲ - mountain peak
 - - claim post
 - ~ - assumed fault
 - 5 - dark green - dark grey - black aphanitic basic dikes
 - 4c - white to creamy aphanitic felsite
 - 4b - dark grey aphanitic felsite porphyry
 - 4a - light grey - tan - white rhyolite porphyry to felsite porphyry ("Nisling Range Rhyolite")
 - 3b - fine to medium grained hornblende diorite to gabbro
 - 2a - medium grained biotite quartz monzonite ("Nisling Range Granodiorite")
 - 2b - dark green to black basalt to andesite
 - 1 - fine grained banded quartzite with interbeds of quartz biotite schist, garnet biotite schist, and limy banded quartzite
