Mr. Norman Jarvela,
c/o Job 679,
General Enterprises Ltd.,
Box 8029,
Whitehorse, Y.T.

Dear Mr. Jarvela:

I have received back the assay report on the specimen of massive galena that you brought to our office about a month ago. The sample ran 67.9 oz/ton silver and 45.7% lead. These values give a silver/lead ration of close to $1\frac{1}{2}$ ounces silver per 1% lead which is interesting and well worth following up.

I suggest that we get in touch with each other again about next May and endeavour to have the indian from whom you received the sample show us the location.

We will look forward to hearing from you in the spring.

Yours very truly,
ATLAS EXPLORATIONS LTD.

R.E. Gordon Davis
Vice-President Exploration
