Re: D.C. GROUP - FRANCES LAKE AREA

Further to your telegram of June 23, I note from your memo of December 6 that you recommend an examination of the D.C., A.L. and B.M. groups and should, perhaps, include prospecting, mapping and geochemical survey in the area. McBean has agreed to a two-week period to examine the property before we made a decision. Before proceeding with any detailed work, I think the actual examination should be made to size it up. The area appears fairly active and there may be some other parties go into it before too long.

Today I received a submission from Bill Wark of Wark Agencies Ltd. and H. H. Kepper, an employee of Texaco of Canada, 2695 Granville Street, Vancouver, B. C., telephone 736-6631. Kepper and Wark are joint owners, along with a prospector named Bill Duncan (now working for Sevensma) of 16 claims known as the K.F. 1 - 8 and D.F. 1 - 8, located 4 to 5 miles south of the D.C. group and the MAX group (owned by Shulman in Vancouver and staked by Max Martin this spring.) These are located on Sheet 105H2. They were staked in April and cover a find made by Duncan possibly earlier. Not too much is known regarding the find with the exception of a map, copy attached, and some grab samples assaying high in lead, zinc and copper. Sample A assayed 12.20 silver, 27.50 lead, 18.20 zinc. Sample B assayed 1.45% copper, trace molybdenum. The same Sample B assayed by Bethlehem Copper assayed 1.88 silver, 8.80 copper and 4.90 lead. Apparently Robin Anderson of Bethex was to examine the showing but has put his visit off until September. The property lies 8 miles from the Cantung Road and is probably only accessible by chopper or by foot. Wark and Kepper are to contact me on Wednesday regarding the terms of a deal on this property. If it is reasonable, it could probably be examined at the same time as the McBean property, although it might be difficult to find without the aid of the prospector

himself. He is apparently working for Northgate Mines and is at present in the Yukon. Perhaps he could be contacted in the field, if satisfactory arrangements are made with Wark. The claims lie at an elevation of 4500 feet and are probably not available for examination until July. Shulman may be doing work on the MAX group at this time.

NOTE: Disregard Wark's submission, as his partner, Kepper, let us down badly and made a deal within 10 minutes of leaving our office.

June 27, 1967.

1:50 p.m.

Mr. Chisholm:

Bill Wark phoned to say the deal is off.
Mr. Kepper found a man at lunch time to whom he sold
the entire deal for cash and a slight escrow position.
Mr. Wark would like you to put the documents together
and leave them at the switchboard and he will pick
them up.

Dorothy Hyssop.

SUBJECT

MAX MARTIN - MAX GROUP

MESSAGE

Max Martin advised me today he is going to his Max group on the Frances River sheet. He will get in touch regarding arranging for us to examine. As you know, it's near the DC of McBean. He says these are small veins and big floats. He is trying to locate old campsite showings 200 yds. from it. Better if Max there to show. Consider sending Tim Sadlier-Brown in and also look at Glenna of Turner's. Max says Glenna best show of bunch. DC small and erratic. Max once had it staked. Dropped. Leon LaPrairie, Pres. of Silver Key, says he will drill Matt Berry property in fall. This general area looking better and established roads. Keep eye on it. Impress on him need for quick reporting when he finished looking at a property. Perhaps he and a sampler could assess these in chopper in few days - widths - lengths - and est. grade. Planning could cut chopper time; perhaps fly camp in area and walk to shows. Leave to your discretion. Don't make a picnic out of it.

EOC.

P.S. Max says has an outfit looking at his Stikine copper show
(from Toronto). EOC.
