SEND DOWN CLAIM
MAPS 105 F-15, 105 A-10,

① Frequency of values against concentration on normal graph paper

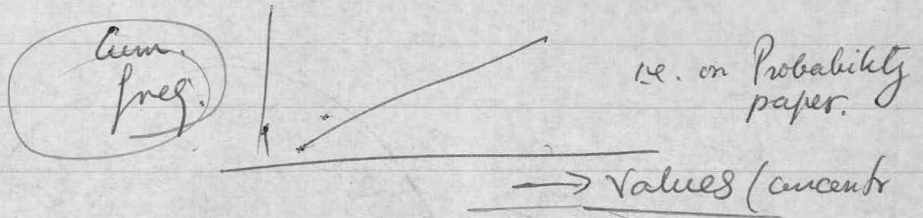

③ Probability paper

Cumulative freq % of freq against concentration gives straight line.

Threshold = Mean + 2S.

④ For irregular distribution take threshold as value which exceeded by no more than 2 1/2% of the total value of observations

i.e. take to 97 1/2% confident limits [Omit high erratic values.]

Thres = 2 1/2% x # of observations.
