As suspected the samples sent with Blake Macdonald to Cantung were not tungsten. A complete spec was run on each sample and no results significant of economic mineralization were encountered. The samples (as defined by CANTUNG) are well silicified limestone with chert banding that cannot be seen without the aid of an ultraviolet lamp. Better luck next time.

A.E. Aho coming in tonight with this letter to stay for one day examination. I would hope chopper recce can be completed by Thursday night and that you can take it back to Pay Friday morning for Sheldon OEX move. Pete should be re-supplied and set out in his one week fly camp to be serviced again August 29th by Vandeboss
